

LA = LAleph

it's the hub of all hubs, a microcosm of the world

the world contained in a point. a point which is a 60 mile circle.

we need a space to celebrate the collective.

a space where we can all hang out. meet and share.

celebrate the understructure of freeways

change perceptions - not dreary scary no mans lands but hypostyle
halls forests of noble concrete columns that support the collective

freeways connect us all - a rare free public connective space in LAleph

temples to the city. downtown LA the biggest freeway hub

5, 10, 60, 101, 110

bound but not defined by

o let me be lost if must be so!

o you and I! what is it to us what ^{THE} rest do or think?

what is all else to us? only that we enjoy each other and exhaust each
other if it must be so;

from the master, the pilot I yield the vessel to,

I love you, o you entirely posses me,

~~that we would escape from the rest and go utterly off face and~~

~~l~~

~~the air is bounded. invisible made visible.~~

~~propose jungles~~

air is bounded. invisible made visible.

propose jungles

dreams need a face

ear nose throat. pink truth, queer terrorist, rainbow concrete.
concrete has no bounce no mercy its completely unforgiving
beyond suede red circulation constraints curtain wall

for him I sing

I raise the present on the past

as some ~~plum tree~~ tree out of its roots, the present on the past

with time and space ~~him dilate and fuse the immortal laws~~

to make himself ~~by them the law unto himself~~
NATURE

~~beyond resourcism. beyond nature as other.~~

~~future tradition of nature NOW!~~

→ from my own voice resonant, singing song of human nature.

~~save nature. we are nature. save us.~~

→ the mind is nice. the body is lazy.

~~future of open space is connecting people and their ideas.~~

~~the leading cities of the future will be those that connect their citizens
as much as possible as rapidly as possible.~~

~~future tradition of civilization is a culture of humans as nature.~~

~~how to restructure our economy~~

~~our economies depend on military spending~~

~~change how our economy is organized~~

~~more economic choices~~

~~change how we make political choices~~

We gathered here at the gorbals tonight under the Alexandria
We los angeles and so on.

there is no great space suspended in the heavens. its all here
connect our ground downtown to the heavens

keep land on the ground public dont wall any site

no more monoliths

to porous picturesque planted park ~~monoliths~~ habitable MOUNTAINS

—
it is time. for it to grow within itself.

—
The freeway is a river of humanity. the space under is amazing

Among the greatest structures here

Deify underpasses transform to temples for humanity

Under the 10 freeway from hope to olive the south edge of downtown
is a beautiful multi columnar space it's a parking lot now

Remove the need for cars by running mta 24/7 with no wait more than
7 minutes. ~~ON ANA LINE~~ First step toward a mobile ~~a~~ connected los angeles ~~CONNECT~~ every

person with every part. Develop each place's power, history, meaning

Open arch short buses crawling the sidewalks. Bus tv broadcasting

history and current events of each block

—
optimism is critical. teach love in schools. stop supporting and making
dystopic media. seems the majority of ~~filmic~~ images of downtown LA
depict crime happening here no more please.

its great place everyones nice & gets along doesnt sell media.

does not have to be that way. they tell us to believe in tech nological

omnipotence but a small social change of more healthcare - thats

impossible. the impossible is happening everywhere in technology.

social change is ~~possible~~ possible.

the ruling ideology tells us it will disturb the market. and it will.

governments act as partners and assistants of the conventional power

structure. the big mistake is relying on the existing monopolies to

deliver the solution. those in power have the least incentive to change.

it is a structural fight. between centralization and decentralization
between ~~energy~~ dictatorship and ^{energy} participation. nothing works
without energy. We can make our ^{own} energy. Individually or in groups.
A fast energy shift is possible. Produce our own renewable energy.
Energy is independence. We all come together here, a collection of
individuals ~~power groups~~ so strong that the
behavior of ~~our congressmen~~ our congressmen is not really
independent. this is a situation that means the ~~energy~~ change in the
~~must~~ must come from the local level. One should not wait in
~~America~~ for the federal level. the king of Saudi Arabia represents a
feudalistic regime of the Middle Age. Against any dignity pragmatically.
the gigantic energy potential is the renewable energy potential always
all coming from the sun, including its derivatives like wind and the
photosynthetic plants hydro base and the sun offers to our globe in 8
minutes as much energy as the annual consumption of fossil and
atomic energy is. Doubting that there will be enough renewable energy
is ridiculous there is by far enough the big mistake is relying on the
existing power providers to organize the transformation

essential to make the city livable desirable affordable
in order to save the country from extinction of nature
we are nature

teach love in schools

i can write about my work, I can write about how every emotion
humans have is not a part of the English language

When you've been a place so many times you start to see without your
self you see yourself walking on screen shot from around the lower
door hinge of the bathroom door

Crisis: every vacant ^{SPACE} soon to filled with generic

There is sacred space. And we can make more. Sacred space doesn't
have to deny earth in favor of above. Connect the sky to the ground,
allow any visitor to ascend above the trees above adjacent buildings

climbing up meandering paths up through inside and outside around a multiplicity of uses small and large space built ^{to} heavy manufacturing standard able to be used for commercial industrial or residential

Clearings along the path in this forest | for connection spaces leisure places scaffolding forests not singularity plurality lattice

^{EXPRESSION}
WAIT
We need More housing its way too fucking expensive to live here

Generic under freeway solutions how the city meets the freeway and the neighborhood on the other side solution is in the backyards, individuals not global. I don't want to be global. Im cool with my four mile radius so mucdh to be done right here how can we connect as rapidly as possible maximize idea transmission burn less and grow more we all rise together we need to keep sharing. Redefine the problems themselves change how our economy is organized more economic choices change how we make political choices beyond nations not just the current abstract: you have your world I have my world how we will politely ignore each other we have no right to take this arrogant view of offended people who are horrified

No we need to stop enabling what is going on

A revolution is not a spectacle, there are no spectators everyone participates whether they know it or not doing nothing in a period of repressive violence is itself a form of violence. You allow your country to murder people and don't do anything about it - that's violence

We are taught that all violence that is not sanctioned by the government is either criminal or mentally ill communists tried to take power of Afghanistan and we Americans backed the muslim fundamentalists we created fundamentalism before we started this mess they were not primitive ~~we~~ we should redefine the problems themselves, the problems are much more general. our economy

depends on military spending. We are blackmailed at this everyday level clean consumption myth. Resourcism. Nature is beyond resource. We humans are nature. Redefine our tradition: the future tradition of nature is fusion ^{with} civilization and culture. We leaves. Soil plant us all all of of ourselves without each other we cant survive unless we act as nature, biosyntheses culture civilization. Pour each idle time into collective expression energy production free thought as an act. From the hour of shining stars and dropping dews.

Memory is a problem, cant sustain pleasurable experiences fade constantly need more good times. I get lost documenting the past. Im swimming in a sea of images writings drawings paper & pixels crunch time laden with ambition and too many drafts

~~_____~~ FROM
THAT OF MYSELF WITHOUT WHICH
I WERE NOTHING
